SKILLS

Languages: HTML,/CSS, JavaScript/TypeScript , Java, Python,
Frameworks / Libraries: React, Next.js, Tailwind CSS
UI/UX Design: Visual Hierarchy, Typography, Wireframing, Basic HTML/CSS
Tools and Platform : Git, Node.js, GitHub, Vercel, PostgreSQL, Figma

EXPERIENCE

Frontend AI Engineer *AUGUST 2026 - PRESENT*
FlyRank

- Integrated real-time streaming LLM APIs into dynamic chat interfaces, reducing visual response latency by 35%.
- Optimized component rendering pipelines across 5+ core AI feature workflows, boosting user engagement by 25%.

Lead Researcher *JANUARY 2026 - PRESENT*
University of Cabuyao

- Directed a 4-member research team in designing and deploying "CoBuy," a product recommendation system.
- Analyzed dataset patterns across 50,000+ user interaction logs to refine machine learning model parameters and reduce prediction error.

Student Volunteer *JULY 2026*
DEVCON Laguna

- Mentored 30+ students through hands-on workshops covering foundational programming concepts, robotics, and logical troubleshooting.
- Facilitated collaborative group coding challenges for 8 student teams, fostering early interest in software engineering.

Product Operations Lead *JANUARY 2026 - APRIL 2026*
Wadhwani Center

- Led a cross-functional team of 4 in mapping critical operations workflows, cutting incident reporting latency estimates by 40%.
- Synthesized user research from 20+ stakeholder interviews to prioritize core features for initial prototype development.

PROJECTS

Project Lead, CoBuy *2026*

- Led a team of developers to build and deploy a Flask-powered Rule Mining application, delivering the project 2 weeks ahead of schedule.
- Streamlined transaction data uploads and data mining workflows, increasing analysis throughput by 30% for shop managers.

Project Developer, Macro-Mate *2026*

- Developed a full-stack personal nutrition and macro-tracking web application serving 50+ active beta users to monitor daily dietary intake.
- Integrated dynamic nutrition logging features and real-time health analytics, helping users track caloric targets with **95%** logging accuracy.

ACHIEVEMENTS / CERTIFICATES

Data Engineer in Java Track, DataCamp *AUGUST 2026*

- Completed 27 hours of hands-on data engineering coursework across 9 dedicated modules, covering JDBC database connections, Tablesaw data manipulation, and PostgreSQL query optimization.

Software Engineering Principles in Python, DataCamp *JULY 2026*

- Mastered object-oriented programming, unit testing with PYTEST, and modular package design by completing 51 interactive coding exercises.

DEVCON Kids Roadshow: Micro:bit Robotics Learning Program, Bay, Laguna *AUGUST 2026*

- Served as a mentor, guiding children through hands-on robotics, coding, and problem-solving activities using Micro:bit to spark their interest in technology and creative thinking

EDUCATION

University of Cabuyao *2023 - 2027*

- Bachelor of Science in Computer Science

University of Cabuyao *2021 - 2023*

- Science, Technology, Engineering, and Mathematics
